

HI-VIS CLOTHING

EN ISO 20471

HI VISIBILITY GARMENTS ARE USED IN AREAS WHERE IT IS A REQUIREMENT TO IDENTIFY CLEARLY, PERSONNEL WORKING IN A HAZARDOUS ENVIRONMENT TYPICALLY ON A CONSTRUCTION SITE OR ON CONSTRUCTION WORKS ON PUBLIC HIGHWAYS. GARMENTS ARE GROUPED INTO THREE CLASSES BASED ON THE CONSPICUITY PROVIDED, WITH THE CLASSES DICTATING THE MINIMUM QUANTITIES OF BACKGROUND AND RETROREFLECTIVE MATERIALS TO BE USED.

CLASS 3:

Highest Protection Level:

For Motorways and High Speed Roads. Bands of retroreflective material shall not be less than 50mm wide.

(Minimum background material 0.80m², Minimum retroreflective material 0.20m²)

CLASS 2:

Intermediate Protection Level:

Bands of retroreflective material shall not be less than 50mm wide.

(Minimum background material 0.50m², Minimum retroreflective material 0.13m²)

**CLASS 2
WAISTCOAT
2 BAND/ 2
BRACE 2B / for
Public Highways**

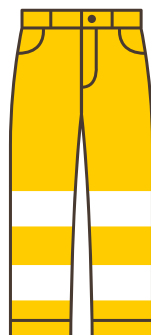

**CLASS 2
WAISTCOAT
1 BAND/ 2
BRACE 1B / for
Confined Sites**

CLASS 1:

Lowest Protection Level:

Where advanced visibility is an advantage, but for minimal risk/ offroad purposes only. Bands of retroreflective material shall not be less than 50mm wide.

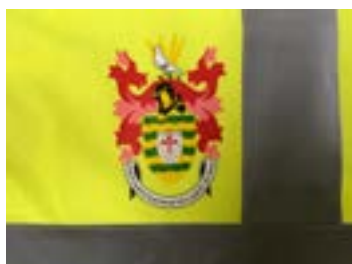

(Minimum background material 0.14m², Minimum retroreflective material 0.10m²)

GO/RT 3279 Approved garments for rail workers

Document mandates minimum requirement for hi-visibility clothing to ensure conspicuity for workers on the track or on the lineside.

EN343 - See Page 113 Section 8 - Outdoor Wear

SCREEN PRINTING

Predominantly used for hi-visibility garments, industrial ink is used to print a company logo or required message on the back or front of the garment. The most common and economical logo print is done in 1 colour, but can also be done in 2 or more colours.

There is no setup charge for the logo print and once a logo is on file it can be used as a formula for printing all future garments for that customer. Garments with ink print logos can be washed according to normal washing procedures as indicated on the label of the garment.

This is the most economical method for large printing quantities.

IN-HOUSE HEAT SEALING

We stock customers' logos and heat seal the logo onto garments as required using our in-house heat seal machine. Logo stocking is subject to agreement and commitment from customers.
