

# 3M™ Disc Filter

## 2138 GP2/GP3 Particulate

3M™ Disc Filter 2138 GP2/GP3 Particulate is one of the 3M™ 2000 series of filters that provide a lightweight filter option for 3M™ Half and Full Face respirators.

### Features

- Contains advanced Electret Media for maximal filtration efficiency & light weight.
- Low breathing resistance
- Approved as a GP3 filter
- Lighter than conventional filters that provide comparable protection.
- Durable, water-resistant and flame retardant.
- Bayonet fitting ensures precise & safer locking
- Versatility: can be used on all 3M 6000, 3M 7000 & 3M 7500 Series Half Masks and Full Face Masks
- When selected and used in accordance with AS/NZS 1715, the 3M™ Disc Filter 2138 is capable of providing protection against particulates at levels up to ten (10) times the Exposure Standard on a half face mask and up to one hundred (100) times the Exposure Standard on a full face mask.

\* Nuisance levels are those levels below the ASCC Exposure Standard

### Specifications

- Weight: 12g per filter (nominal).
- Size: 11cm Ø x 1cm deep (nominal).
- Tested and meets specifications to AS/NZS 1716:2003 Class GP3 particulate filter when used with compatible 3M respirators.
- The 2138 filter has been classified as a GP3 particulate filter, and is thus able to be used for protection from mechanically and/or thermally generated particulates i.e. it provides protection against dusts, mists, fumes & ozone as well as for toxic materials like beryllium.. It is also suitable for use against low vapour pressure chemicals (V.P. <1.3 Pa or 0.01 mm Hg at 25 deg C) up to ten times the Exposure Standard and also offers relief from nuisance\* levels of organic vapours and acid gases such as chlorine & sulphur dioxide.

**NOTE:** The 3M™ Disc Filter 2138 provides GP3 protection only with full facepiece respirator. Provides GP2 protection with half facepiece respirator
